**Contemporary Controls' Electronics Engineer is
Recognized as a Top Fundraiser in the MS150 Bike Tour**

Rhiannon LaPointe Receives Leader Jersey for Raising \$2050

Downers Grove, IL (July 30, 2007)—Contemporary Controls' Electronics Engineer Rhiannon LaPointe is a dedicated fundraiser for the Greater Illinois Chapter of Multiple Sclerosis for she cycles in the MS150 Bike Tour year after year. Just recently, she was recognized as a top fundraiser by receiving her Leader Jersey. She collected \$2050 as part of her effort to meet her team's goal of more than \$4,300.

LaPointe was among 1,900 riders who cycled to and from Northern Illinois University in DeKalb, Illinois, June 23rd and 24th. As captain, she had much praise for her team. "Even in the rain that continually poured on Saturday, my team kept their spirits high. Year after year, these individuals volunteer their time to raise money to make life better for those stricken with multiple sclerosis."

She further stressed the dedication of other volunteers. "I remember one volunteer who was still driving riders to the dormitory at Northern up to one-half hour before his wedding on Saturday. On Sunday, he was back on the route in his support vehicle with a "Just Married" sign on the rear of the car. Now that takes dedication!"

-MORE-

LaPointe has been employed with Contemporary Controls, an industrial networking manufacturer, for six years. In her position, she is responsible for the design and development of products utilizing various technologies.
